EDUCATION

University of California, San Diego

B.S. in Data Science, Minor in Business Economics, GPA: 3.99/4.0

Sep 2023 – Jun 2027

La Jolla, CA

EXPERIENCE

Software Engineer Intern, Algorithms

Applied Materials

- Incoming Summer 2025

Jul 2025 - Sep 2025

Santa Clara, CA

Software Developer Intern

Mesirov Lab at UCSD

- Enhanced a Plotly Dash data visualization application to support cancer treatment decisions by medical researchers, improving insights into drug efficacy. Containerized the app using Docker for seamless deployment and reproducibility
- Implemented a secure file download feature using ZIP compression and access controls, enhancing user experience and protecting sensitive health data
- Developed an interactive heatmap using Plotly Go to visualize drug correlations, allowing users to toggle between Pearson, Spearman, and Kendall coefficients for customized analysis

Jan 2025 - Present

La Jolla, CA

Computer Science Tutor

UCSD CSE Department

- Guided 40+ incoming UCSD computing students in mastering Python programming, debugging, and fostering logical problem-solving skills
- Supported and advised on 20+ student-led projects, including machine learning models and web applications, from ideation to implementation
- Delivered lessons on theoretical computer science topics such as algorithm design, sorting techniques, and dynamic programming, ensuring concepts were accessible and engaging

Jul 2024 - Aug 2024

La Jolla, CA

PROJECTS

Environmental Sustainability Web App | *HTML, CSS, JavaScript*

Oct 2024 - Dec 2024

- Collaborated with a team of 5+ engineers in an agile environment to develop a sustainability-focused lifestyle app, promoting eco-friendly practices
- Designed and implemented an interactive quiz using JavaScript to engage users and enhance app functionality
- Built and styled responsive web pages using HTML and CSS, incorporating Flexbox and Grid for layout management and ensuring cross-browser compatibility

Alzheimer's Diagnosis Detection | *Python, Scikit-learn, Matplotlib, Seaborn, Pandas*

Jun 2024

- Developed interactive visualizations using Matplotlib and Seaborn, highlighting key trends across 5+ demographic and health-related features
- Engineered an end-to-end logistic regression model using Scikit-learn to evaluate correlations, achieving 85% accuracy in predicting Alzheimer's diagnosis
- Employed random forest classification to rank the relative importance of features, identifying the top predictors of disease risk with a feature importance score threshold of 0.1

Turtle Graphics Translator | *Python, Raspberry Pi, Git*

Aug 2023

- Designed and built a custom turtle robot that translates Python's turtle graphics into physical drawings in real time
- Engineered the robot using a Raspberry Pi, servo motors, and a pen, reducing material costs by 20% compared to similar manual robotics projects
- Wrote Python scripts to hard-code robot movements, enabling accurate rendering of all 26 English alphabet letters with 95% precision

PROGRAMMING SKILLS

Programming Languages: Python, Java, HTML/CSS, JavaScript, SQL

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn, Plotly, Plotly Dash
